# Chapter 1

## Entry Point

She had never seen a rainbow table that large before. it was beautifully indexed before her, all she had to do was reach out and grab it. The table bulged with data and begged for use, though she wanted to find the owner of the table first. She wandered around the room looking for this mysterious man, and then just around the corner she saw the tip of a black hat poking over the top of a rugged screen.

She walked around the corner and as she saw him her heart raced as he fingered the keyboard with skill and dexterity. She instantly felt a connection and saw a future with this wild stranger. He heard her footsteps and looked up. He stepped up and wandered towards her. As he began exploiting her vulnerabilities, a grin crept upon his face. His XSS was just the beginning.
